

ATUL BHARDWAJ

Seattle, WA • (206) 609-4655 • atuloninternet@icloud.com • [linkedin.com/in/atul1000/](https://www.linkedin.com/in/atul1000/) • atulbhardwaj.com
Authorized to work in the U.S. via STEM OPT through mid-2029. No immediate sponsorship required.

SUMMARY

AWS-certified builder who has built on both sides of the table: shipping production AWS applications and operating as the end-user feeling the problems they solve. Currently running two live applications (three-tier and serverless), each driven by customers' needs. Scaled the SU AWS Cloud Club from 13 to 90+ members through technical leadership.

CERTIFICATIONS

AWS Certified **Solutions Architect – Associate**

AWS Certified **Cloud Practitioner** | AWS Certified **AI Practitioner**

BeSA Agentic AI Graduate - Strands Agents SDK, Bedrock AgentCore, MCP

PROFESSIONAL EXPERIENCE

Cloud Solutions Lead | AWS Cloud Club, Seattle University *Jan 2026 – Present*

- Scaled the club from **13 to 90+** members in two quarters by building partnerships with AWS Solutions Architects, Developer Advocates, and the AWS Skills Center, turning cold outreach into recurring collaboration.
- Built a direct relationship with AWS VP Jeff Barr through cold outreach, securing **\$10K in AWS credits** and a co-hosting partnership with UW for a 24-hour, three-track hackathon (Build with Bedrock, Serverless Solutions, Cloud for Good).
- Evangelized AWS services (Bedrock Knowledge Bases, Lambda, API Gateway) through cloud architecture workshops for **20+ builders per session**, helping participants select scalable, cost-effective solutions for their own workloads.

Data Science Consultant | Statistics Without Borders *Sep 2025 – Apr 2026*

- Served as technical point of contact across **7 teams (14 contributors, 14+ datasets)**, distilled data quality issues into clear technical requirements, and presented standards to non-technical leadership that the organization adopted.
- Migrated 14 contributors from unversioned email workflows to GitHub, accelerating adoption by authoring onboarding docs that got non-technical members committing in under a week.

Operations Technician | Seattle University *Oct 2024 – Present*

- Gathered stakeholder feedback and cross-referenced it against parking and transit utilization data, identified 7 plans adding cost without serving demand, and translated findings into a consolidation recommendation leadership approved.
- Found a manual bottleneck in ID card fulfillment (staff hand-sorting **200+ cards per batch**), rewrote the Entrust batch SQL to auto-sort at query time, eliminating the manual step entirely.

HANDS-ON PROJECTS [\[github.com/4uatul\]](https://github.com/4uatul)

SUChatBot - Campus Services RAG Chatbot [SUChatBot.atulbhardwaj.com]

Tech: Bedrock, Lambda, API Gateway, S3, S3 Vectors, CloudFront, Titan Embeddings V2, Claude Haiku 4.5

- Migrated knowledge discovery from **53 static SharePoint** pages to a serverless RAG chatbot, giving customers across 5 departments on-demand answers instead of queuing for staff.
- Selected S3 Vectors over OpenSearch (**~\$350/month savings**) and Haiku 4.5 for sub-3-second latency at minimal cost.

Lost & Found Platform [LostAndFound.atulbhardwaj.com]

Tech: S3, CloudFront, EC2, RDS, VPC, Cognito, Lambda, IAM, GitHub Actions, React, Flask, PostgreSQL, nginx

- Unified lost-and-found tracking across **4 customer-facing offices** with a three-tier AWS application. Chose EC2/RDS over serverless to eliminate cold starts and deliver a seamless user experience. Running at **\$0.90/day**.
- Designed a **custom VPC** with public/private subnet isolation across two AZs, restricted RDS to application-tier security groups only, and scoped Cognito auth to @seattleu.edu emails.

CORE SKILLS

Cloud Architecture: Multi-tier and serverless design patterns, VPC networking, cost optimization, CI/CD, migration

AWS Services: EC2, S3, RDS, VPC, Lambda, CloudFront, Cognito, DynamoDB, Bedrock, API Gateway, S3 Vectors, IAM

AI/ML: Bedrock Knowledge Bases and AgentCore, RAG, Titan Embeddings V2, S3 Vectors, Strands Agents SDK, MCP, FAISS

Programming: Python, JavaScript, SQL, Bash, Git, Docker, Linux, PostgreSQL

EDUCATION

Master's in Computer Science, Data Science Specialization | Seattle University | GPA: 3.6 | June 2026

Bachelor of Technology, Computer Science Engineering | Maharshi Dayanand University | GPA: 3.5 | May 2024
